MAILING ADDRESS

646 South Saltair Avenue, Los Angeles 24, California

IMPORTANT TO PURCHASERS

We have been specializing in Pelargoniums and Geraniums for the past forty years. We have customers from coast to coast and their repeat orders are our best recommendations.

All sales and quotations are strictly cash basis regardless of the responsibility of the customer. Our prices are low; we guarantee full count and render the best possible service in every way.

We take every precaution to keep each variety true to name. All claims must be made immediately on receipt of goods. Later claims will not be considered. When loss occurs through our fault, we will correct same, but will not be responsible for damage in transit.

EXPRESS or MAIL ORDERS—We prefer to ship via express, charges collect. If you prefer Parcel Post, please include charges, or add 20 per cent with order. Orders less than \$2.00, add 50c for handling and mailing charges. California customers add 2½% for sales tax, Los Angeles 3%.

NOTICE—When ordering we suggest that you list a few substitutes in case some ordered are out of stock. Or may we substitute with an equally good variety, or a larger size?

DESCRIPTIONS

We have given our own description of each variety. It should be clearly understood that cultural condition (soil, climate and weather conditions), influence many Pelargoniums; especially the Domesticum group, to such a degree that there will be found considerable variation in the size, shape and coloring of the flowers.

Prices Subject to Change

PELARGONIUMS

PEL. DOMESTICUM (P. Hybr. grandiflorum). Lady or Martha Washington Show or Fancy Geraniums. For Spring and Summer blooming, offering a rich and varied combination of colors. Our extensive collection includes new and choice, also old and rare varieties. Many of our own hybrids, some of which are listed here and many more that we sell at the nursery only. Our Pelargonium Display is at its best during the months of April, May and June. Below a list of varieties available. We have many more too numerous to mention. If you desire a variety not listed here, let us know what you want—we may have them in stock—or better still, visit our nursery during the blooming season. Visitors are always welcome.

CULTURE

Pelargoniums grow in most any soil, but preferably in sandy loamy soil. Can be grown in full sun or partial shade. Delicate colors retain their full color by growing them in part shade. Leaf mould is always a welcome addition, also fertilizer, any commercial or well rotted manure, about once a year. Not too often. Watering often during the summer months, or blooming season, whenever quite dry, not too dry. Depending on soil and location. During the winter months after trimming, or pruning is done, do not water for several weeks. Then watering only when very dry. For potted plants, they require a richer soil, sand humus, medium garden loam, well rotted manure and commercial fertilizer sparingly. During the spring and summer months they can be fed with small amounts of fertilizer every month or so. Or use liquid fertilizer. Plants should be pinched back a few months before blooming season which begins March and April, depending on weather and location.

For complete culture, we refer you to a new book, "Geraniums", written by Helen Van Pelt Wilson. \$2.75 per copy.

A NEW BOOK ON "GERANIUMS"

By **HELEN VAN PELT WILSON**

A new slant on an old-fashioned plant appears in this complete guide to all Geraniums of the Pelargonium class. Gardeners from Maine to California, enthusiasts with window plants or a greenhouse collection, all will find this new book—the only modern one on the subject—a stimulating account of a fascinating subject.

Included are chapters on Scented Leaved, Colored Leaved, Ivy Climbing, Cactus and Pelargoniums (known as Martha or Lady Washington) varieties. If Geraniums aren't your hobby when you start to read this book, they will be when you finish. \$2.75 prepaid.
